

**Penegra** is a high-quality brand of Sildenafil (100 mg) that induces hard erections which can last for an extended duration thereby enhancing confidence, well-being, and satisfaction in men. Penegra is used for the treatment of erectile dysfunction-ED (the consistent or recurrent inability to obtain and/or maintain an erection for sexual activity).

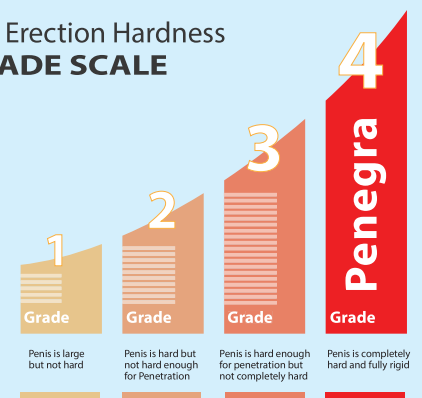

### How it works

**Penegra** increases the amount of blood that flows to the penis. This causes hard erections which can last for an extended duration. **Penegra** works with sexual stimulation to achieve a completely hard and fully rigid penis (GRADE 4 ERECTION).

### How to use

- **Penegra** should be used after consultation with a healthcare provider
- 50 mg to 100 mg is the recommended dosage that should be taken only once in a duration of 24 hours
- The dose is to be taken 30 - 40 minutes before sexual activity
- Avoid alcohol and fatty foods along with the dosage for proper drug absorption
- Never exceed the prescribed/recommended dose

### The Erection Hardness GRADE SCALE

### Who can use

- Men who have trouble getting or keeping an erection (erectile dysfunction) and want to enjoy a satisfying sexual experience
- Men who desire to reach Grade 4 erection for a long and more satisfying experience for themselves and their partners
- Men on certain medication who desire to boost their confidence and enjoy sex

### Who cannot use

- Males below 18 years and females
- Men with medical conditions e.g liver dysfunction, kidney dysfunction, hypotension, recent stroke or heart attack
- Men taking certain medications e.g Nitroglycerin, Sodium Nitroprusside, Amyl Nitrite, Erythromycin and Cimetidine

### Benefits

- Experience the Penegra effect (GRADE 4 ERECTION) - completely hard and fully rigid erection
- Enhances confidence in men who are unable to achieve and/or maintain an erection
- Delivers satisfaction for both partners in sexual relations
- Very effective and can last for up to 6 hours
- Taken only when needed – no routine administration

### Common side effects

**Penegra** side effects are often mild and go away on their own. They include, nausea, headache, diarrhea, chest pain, muscle ache, allergic reaction, prolonged erection and nasal congestion.
