

#1 emergency contraceptive pill in Nigeria

POSTPILL

Emergency Contraceptive Pill
Levonorgestrel 1.5 mg

POSTPILL is a very effective ONE-DOSE emergency contraceptive pill that gives women a last chance to prevent pregnancy after unprotected or unplanned sex. POSTPILL contains one tablet only of 1.5 mg Levonorgestrel.

How it works

POSTPILL mainly works by temporarily delaying ovulation until there is no sperm to fertilize the egg. It also slows down the active forward movement of sperm by thickening the cervical mucus.

How to use

For best results, **POSTPILL** should be taken orally as soon as possible within 24 hours, but can still be taken within 5 days (120 hours) of unprotected sex.

Who can use

Any woman who had unprotected or unplanned sex and needs to prevent pregnancy.

Who cannot use

POSTPILL is not suitable for women with confirmed or suspected pregnancy.

When to use

POSTPILL can be used by any woman in the following situations:

- Had unprotected sex
- Partner insists on withdrawal method
- Not on any regular method of contraception
- Relies on traditional methods of contraception such as calendar based or withdrawal methods
- Inconsistent use of contraceptive - forgot to take the daily pill, got carried away and forgot to use a condom
- Cases of contraceptive failure - condom broke, slipped off or worn wrongly
- Forced to have unprotected sex

Benefits

- **POSTPILL** is safe for all sexually active women including breastfeeding mothers with babies 6 weeks or older
- One-dose regimen ensures improved compliance
- Available in all pharmacies and chemist stores
- Quickest and easiest option for preventing unplanned pregnancy
- Gives confidence and peace of mind after a sex emergency

Common side effects

Not everyone will experience side effects. They are often very minimal and go away quickly.

These include:

- Nausea
- Headache
- Dizziness
- Breast tenderness
- Lower abdominal discomfort
- Menstrual change (period may come early or late)

Recommended by the WHO & the American College of Obstetricians & Gynecologists
